Marlin Steel Wire Corporate Presentation

Thursday, March 8, 2012 | 5:00 pm | DeWALT Seminar Room, 2164 Martin Hall

Light refreshments will be served.

ABSTRACT: Drew Greenblatt, President of Marlin Steel Wire in Baltimore, Maryland will share the strategic repositioning of the company when faced with daunting international competition. He will share how University of Maryland Mechanical Engineering graduates are key to the success of his company and his vision of the future.

BIO: Drew Greenblatt purchased Marlin Steel Wire in 1998 and since then has increased its revenue six fold. Greenblatt has testified before the U.S. Senate and U.S. Congress several times on topics such as small business, taxation, regulations, trade policy, and methods to grow the economy. Greenblatt holds a BA from Dickinson College and an MBA from Tulane University.

Marlin Steel produces custom wire baskets, mesh baskets, stainless steel products, custom wire forming, and precision sheet metal fabrications. 30% of Marlin Steel’s team are mechanical engineers or designers. Marlin Steel makes everything in the USA and is the world's fastest fabricator.
